Abrasion resistance:

AirTech + Technology 4x4

ULTRAFLEX

The **4x4** technology, designed by Base Protection, combines the **lightness** of the sole with a **high resistance to bending, abrasion and tearing**.

The **AirTech + Tpu-Skin Ultraflex** outsole combines the anti-fatigue effect with a better shoe flexibility.

- The external sole layer, the outsole, is reduced to 0.2 mm, a more resistant "skin" to flexions and abrasion.
- The outsole reduction increases the Air-Tech thickness, softer and elastic, improving the shock absorption and body weight distribution.

Result: an ideal shoe for outdoor work, light and robust at the same time.
