Questo agente impermeabilizzante offre inoltre il vantaggio di un'asciugatura estremamente rapida.

BIONIC - FINISH means a unique, patented system developed to confer water-oil and soil repellent properties and at the same time ensures maximum breathability. The fabric keeps a very soft handle and excellent durability to several washes granting colors vibrant and new. This agent allows textiles to dry more rapidly.

Rappresenta lo stato dell'arte in termini di igiene, sicurezza e comodità. La speciale fibra organica a base di cellulosa che lo compone garantisce la massima traspirabilità che si traduce in una riduzione dell'umidità corporea del 50% rispetto al cotone naturale, un ambiente fresco e asciutto inoltre riduce drasticamente la proliferazione dei batteri. Tencel è dermatologicamente testato ed è adatto anche alle pelli più sensibili. Altra particolarità di questa fibra è di essere un ottimo isolante, espellendo l'umidità infatti, mantiene il corpo fresco e asciutto.

Tencel is unique in terms of hygiene, protection and comfort. The special cellulosic fiber extracted from raw materials woods regulates absorption and release of moisture measured in a 50% improvement in comparison to cotton. The formation of bacteria is reduced thus moisture is immediately transported into the inside of the fiber and then released to the outside. Tencel is medically tested and thanks to its smooth surface, the softness is appreciable and prevents irritation of the skin.

Un'innovativa aletta traspirante posizionata nel giro manica realizzata in una speciale rete elasticizzata, garantisce libertà di movimento e freschezza, anche dopo molte ore di lavoro.

An innovative perspirant wing-shaped flap in the armhole, produced in a special stretch network fabric, allows free movements and freshness even after many working hours.

È un sistema innovativo che riunisce in un unico tessuto caratteristiche di repellenza all'acqua sulla superficie esterna e di assorbimento dell'umidità su quella interna. La superficie esterna resiste alla maggior parte delle macchie liquide a base d'acqua e olio, mentre l'interno assorbe il sudore e l'umidità garantendo comodità, freschezza e asciutto a chi indossa il capo.

VANTAGGI

- **Repellenza** della superficie esterna del tessuto. I liquidi e le macchie formano nervature e vengono eliminate, mentre le altre sostanze possono essere rimosse spazzolando o strofinando il tessuto.
- **Assorbimento dell'umidità** dall'interno del tessuto. Il sudore e l'umidità prodotti dal corpo vengono rapidamente assorbiti ed espulsi dal tessuto generando un effetto rifrescante.
- **Asciugatura rapida**. Grazie alla combinazione tra le qualità di repellenza e di assorbimento dell'umidità, il capo si asciuga più rapidamente eliminando le macchie di sudore, il capo sembrerà sempre nuovo.

Standard di qualità e durata

Come tutti i prodotti DuPont Teflon fabric protector supera i rigorosi criteri di qualità del marchio.

It is a new system that guarantees in the same fabric water-repellent features on the external surface and humidity absorption on internal side. External surface resists to the most part oil and water-based stains, while the inside absorbs sweat and humidity in order to guarantee comfort freshness and dry to who wears clothes treated by this technology.

BENEFITS

- **Repellency** of fabric's external surface. Water and stains create ribs and then are eliminated, while other substances can be removed by brushing or rubbing the fabric.
- **Absorption of humidity** from the inside of the fabric. Sweat and damp produced by the body are quickly absorbed, then they expand on the fabric, creating a freshness effect.
- **Quick drying of clothes**. Thanks to the combination of repellency quality and absorption of humidity, fabrics get dry quicker, reducing sweat stains, for clothes that will always look new.

Standard of quality and longlasting

Each DuPont Teflon fabric protector item has to pass strict tests of brand quality.

Consigli tecnici

Per una buona durata dei capi sono consigliabili i seguenti accorgimenti:

1

Lavare i capi in acqua tiepida per almeno due volte.

2

Non lasciare i capi in ammollo.

3

Non è consigliabile usare prodotti chimici e in caso di necessità usare una modica quantità di candeggina (proporzione massima del 2%) solo su tessuti tinti in filo o color bianco. La ditta Giblor's si esonerà da responsabilità per scolorimenti o usure dei tessuti, causati dall'uso improprio di eventuali prodotti chimici.

4

Per gli stampati non strofinare né spazzolare.

5

Il puro cotone prevede un ritiro del 3% massimo.

6

Per lo stiro attenersi alle basse temperature per i tessuti misti e sintetici; per il cotone, invece potranno essere usate temperature più elevate.

7

Mai procedere a smacchiature locali, pena il deterioramento dei tessuti

8

I capi muniti di chiusura lampo vanno allacciati completamente prima del lavaggio in lavatrice

9

Non porre mai a contatto la chiusura lampo con fonti di calore

Technical advices

For a well wearing of the clothes please read the following suggestions.

1

Wash the clothes in lukewarm water at least for two times.

2

Never soften the clothes.

3

If necessary, use a little quantity of bleach (maximum proportion of 2%) only for white and not printed fabrics. Giblor's is not responsible for the fading or wear of the fabrics, due to an inappropriate use of chemical product.

4

For printed clothes do not rub and do not brush.

5

Pure cotton will have a shrinkage of max 3%.

6

How to iron: for the mixed and synthetic clothes use low temperature; for the cotton you can use higher temperature.

7

In order to avoid the deterioration of the fabrics, don't remove stains locally

8

Zip up all the clothes before washing them in the washing machine.

9

Never place the zip in contact with heat sources.

Simboli di lavaggio Washing clothes symbols

lavaggio ad acqua Water washing

La vaschetta è il simbolo grafico usato per le informazioni relative al lavaggio in acqua.
The basin is the symbol used for information relating to water washing.

Il numero riportato all'interno indica la temperatura massima di lavaggio espresso in centigradi: 90°/60°/40° ecc. **The number on the inside indicates the maximum washing temperature in centi-grades: 90°/60°/40° etc.**

La mano all'interno della vaschetta indica che il lavaggio deve essere eseguito a mano e non in lavatrice, che la temperatura massima è di 40°, che il capo non deve essere strizzato. **The hand inside the basin indicates the garment must be hand-washed, that the maximum temperature must not exceed 40°C, and that the garment must not be wrung.**

La croce sulla vaschetta vuol dire che il capo non sopporta il lavaggio in acqua. **The cross on the basin indicates that the garment cannot be washed in water.**

candeggio Bleaching

Il triangolo è il simbolo del candeggio al cloro, cioè con candeggina.
The triangle is the chlorine bleaching symbol, that is with bleach.

Se nel triangolo appare la sigla "CL" è possibile trattare il capo con candeggina solo a freddo e in soluzione diluita. **If "CL" appears in the triangle this means that the garment can be treated with bleach in cold water and diluted solution.**

Se il triangolo è cancellato con una croce, il capo non sopporta il trattamento con il cloro. **If the triangle is crossed out by a cross this means that the garment cannot be treated with chlorine.**
